

# From Neurons to Computers

## A Different Perspective

Mohammad H. Nazeri

Institute for Advanced Studies in Basic Sciences

December 23, 2018

# Outline

- 1 Neuroscience
  - Neurons
  - Facts about Brain
- 2 Math
  - Neuron Model
  - Deep Neural Networks
- 3 References

# Why do we need this introductory talk?

# What is a Neuron?

Our Brain is consists of vast collection of **Neurons**

# What is a Neuron?

Our Brain is consists of vast collection of **Neurons**

# Types of Neurons

# Types of Neurons

- **Sensory neurons** are sensitive to various non-neural stimuli. There are sensory neurons in the skin, muscles, joints, and organs that indicate pressure, temperature, and pain.

# Types of Neurons

- **Sensory neurons** are sensitive to various non-neural stimuli. There are sensory neurons in the skin, muscles, joints, and organs that indicate pressure, temperature, and pain.
- **Motor neurons** are able to stimulate muscle cells throughout the body, including the muscles of the heart, diaphragm, intestines, bladder, and glands.

# Types of Neurons

- **Sensory neurons** are sensitive to various non-neural stimuli. There are sensory neurons in the skin, muscles, joints, and organs that indicate pressure, temperature, and pain.
- **Motor neurons** are able to stimulate muscle cells throughout the body, including the muscles of the heart, diaphragm, intestines, bladder, and glands.
- **Interneurons** are the neurons that provide connections between sensory and motor neurons, as well as between themselves. The neurons of the central nervous system, including the brain, are all interneurons.
